

ECLECTIC

There are two eclectic seasons **winter** and **summer**.

- An eclectic score is the cumulative total of the member's lowest Gross score on each hole from qualifying cards submitted during the season
- The Handicapper records these scores on a spreadsheet which is published monthly on the Club website.
- The season winner is the player with the lowest overall Nett score in each grade after deducting half the player's current handicap i.e. the handicap at the end of the season
- The winning Eclectic score must have a score recorded for every hole
